To you, open-minded business owners who are always trying to improve.

I used to work hard for my business. Nine to ten hours a day. Six days a week.

But I did not start making real money until I did less, a lot less.

In this short letter, I want to share with you my recent discovery and how it helped take my business to an entirely new level.

Our inevitable challenge and what can we do about it...

If you're running a service type business providing quotes to your potential clients, you face an unavoidable challenge—your competition.

You have to win your quotes against the competitors to make money.

Otherwise, all your time dealing with the client, preparing your quote, and spending money on advertising will get wasted.

You may think that you have to reduce prices to win more quotes, but it's not a good strategy. You have to charge what you think is fair for you to do quality work and be profitable. Being the cheapest may win you some jobs, but it will never make you enough money to grow your business and employ the best people in the long run.

When my business partner and I started to search for software for our own business in "bathroom and laundry renovations", we needed a tool that would help us win clients and save our time.

That's how we've discovered this new software called HEYPA!

What happened next was a mind-blowing experience.

Apart from winning 6 out of 10 quotes we've delivered to our prospects through Heypa, we have saved a tremendous amount of time.

For example, you can imagine a bathroom renovation quote is a relatively large document. It used to take me at least 30-40 minutes to prepare a custom quote for a client. I also had to include all relevant attachments with pictures of previous jobs and so on.

Guess what?

My last absolute record with Heypa is only 1 min and 38 seconds to create and send a custom renovation quote.

Can you imagine saving 30 minutes on each quote you have to send?

And you can do it from your phone, minutes after you spoke with a potential client. I'm telling you it's a mind-blowing experience not just for you but for your clients as well. You just have to try it!

To this day, I'm shocked at how much time we have wasted before.

No need for you to remember to follow-up

If you never have time to follow up on the quotes you've sent, well, I hate to break it to you, but it means less work you gonna win. Customers tend to forget about us, especially if you don't remind them about yourself.

Heypa automatically chases every customer you sent your quote to with several smart follow-up emails, not the usual spam. Those emails work like magic. Your customers will feel your genuine attention to their project even before they've chosen you.

For you, it means only one thing, more paying clients on the books.

I can go on about Heypa features and benefits for your business for hours:

- SMS notifications for your clients (They love to be informed)
- Staff time tracking and job scheduling
- Fast payments from clients
- Recurring clients job booking

AND MORE, MORE, MORE

But why don't you take the first step today and try Heypa?
You have nothing to lose, and you don't have to pay a cent if you don't like it.

Just try it. You will never look back.
